

The Events Structure Product Guide

Containers - Champions

Our latest upcycled cluster of converted shipping containers is one of the most unique exhibition containers of its kind. Built to a high standard and with a strong matt black finish that gives it a truly premium look, this event structure is the perfect environment to target, engage and sell to consumers with communication and experiential activities.

Our Champions container is made up of 3 shipping containers, an upper deck and a large

LED screen, put together to have the ultimate impact on consumers. The interior walls are paint finished in matt black on the original architectural corrugation finish, with the back wall containing 3 off graphic positions, each measuring 1500mm², and the bulkhead wall featuring 1 off graphic position, again measuring 1500mm².

The lower level exhibition containers open to the front via a sophisticated roller door system that

Containers - Champions

enables the provision of a 6m access entrance, complete with anti-slip vinyl flooring, while the containers distance to the ground allows for disabled access through Events Structure provided ramps.

The highly impactful upper deck provides an exceptional environment for VIP entertainment or can provide a unique additional consumer area, providing a dynamic environment that can be used for experiential, retailing, catering and hospitality applications, and more. The upper deck is accessed via a single external stair unit that enable a maximum of 12 guests, meaning that it can be used as a viewing platform, a VIP entertaining area, a product demonstration area or a presentation platform.

To power the unit, we provide a connection, 32A 3-Phase Distribution box and cables to the three 32A 1PH mains input. All you need to provide is a 32a 3-Phase feed from an onsite mains power connection or a generator. Internally, the container has an internal power distribution to 8 off 13amp Twin UK sockets.

The raised event container includes an incredible immersive 6-metre LED wall which will feed content throughout the day to consumers and is sure to capture their attention. With a 7mm pitch, 2000hz refresh rate, 6000 nits high brightness and the ability to curve (+/- 10 degrees), this LED screen and features are incredibly flexible and ideal for outdoor advertising or pop up shops.
