## Containers - Container Bar

Our brand new entry level 20' upcycled converted Shipping Container Bar is the best-in-class 6 metre Bar of its kind. The 20' Shipping Container Bar is built to an extremely high standard and has a powerful matt black finish that gives it a truly premium look. Container Bar is the perfect environment to serve, engage and sell to consumers whether testing out a new drink, or selling existing products.

Container Bar opens to the front via a sophisticated roller door system that enables the provision of a 20" (6m) access entrance to the internal environment. The environment is then extended to the exterior through a solid ramp with anti-slip vinyl flooring that allows for disabled access to the experiential zone.

The interior walls are paint finished in matt black on the original architectural corrugation finish. The back wall contains 3 off graphic positions (each 1500mm<sup>2</sup>) and the bulkhead wall features 1 off graphic position (1500mm<sup>2</sup>). Perfect for placing menus or other decorative ideas. There is also room for branding to the face of the bar (6000mm W x 1000mm H x 600mm D).

The Container Bar has an external 32 Amp mains input that can be powered from an onsite mains power connection or generator input. Internally, the container has a fuse box and internal power distribution to 8 off 16amp sockets.
