

The Events Structure Product Guide

Containers - Experiential Container Studio Premium

Our Experiential Container Studio Premium is an upcycled shipping container conversion that provides a highly dynamic experiential environment that combines superior finish levels with affordability. The container studio structure is the ideal environment to target and engage consumers with experiential communication and sales messages.

The Container Studio is constructed using an upcycled 20' side opening ISO container, which

opens to provide excellent access and visibility. The hinged cargo doors open to provide a strong external graphic opportunity for product and brand messages. The interior walls are paint finished and feature the original corrugation, fixings that can carry graphic brand messages and identity throughout the interior. The interior is illuminated using a combination ceiling mounted spotlights and illuminated ceiling panels.

Containers - Experiential Container Studio Premium

The Experiential Container Studio Premium includes an external 32 amp single phase power connection with an internal fusebox and internal power distribution to 8 off 16amp sockets.

The experiential space is maximised by use of an external floor structure which extends the environment to the front with an antislip floor vinyl. This is a covered overhead using an external electrical awning providing weather protection.
