Containers - Gallery

Our entry level 20' upcycled converted Shipping Container is the best-in-class exhibition container. The 20' Shipping Container is built to a high standard and has a strong matt black finish that gives it a truly premium look. This container is the perfect environment to target, engage and sell to consumers with communication and experiential activities.

Gallery opens to the front via a sophisticated roller door system that enables the provision

of a 20' (6m) access entrance to the internal environment. The environment is then extended to the exterior through a solid ramp with anti-slip vinyl flooring that allows for disabled access to the experiential zone.

The interior walls are paint finished in matt black on the original architectural corrugation finish. The back wall contains 3 off graphic positions (each 1500mm²) and the bulkhead wall features 1 off graphic position (1500mm²).
