

The Events Structure Product Guide

Containers - Impact Plus

Impact Plus is the latest generation of our popular Impact shipping container conversion, designed using a High Cube container to give a more spacious environment and strong onsite physical presence. The highly impactful upper deck provides an exceptional environment for VIP entertainment or can simply provide a unique consumer activation area. The Impact Plus event container provides a dynamic environment that can be used for experiential, retailing, catering and hospitality applications,

and benefits from superior finishes throughout.

Impact Plus opens to the front via a sophisticated roller door system that helps to provide a full 20' (6m) access entrance to the internal environment. The upper deck is accessed via a single external stair unit that enables a maximum of 12 guests to enter the gallery. This deck can be used as a viewing platform, a VIP entertaining area, a product demonstration area or a presentation platform.

Containers - Impact Plus

The interior walls are paint finished in white on the original architectural corrugation finish, the back wall contains 3 off graphic positions (each 1500mm \varnothing) and the bulkhead wall features 1 off graphic position (1500mm \varnothing). Alternatively, we have a stud wall system that offers the opportunity to use custom graphics to display your brand's messaging as you see fit.

The Impact Plus event container has an external 32amp mains input that can be powered from an onsite mains power connection or generator input. Internally, the container has a fusebox and internal power distribution to 8 off 13amp sockets.
