## Mobile Showrooms - Expoboxx

From the outside, the ExpoBoxx© is an extremely impressive event structure, thanks to its clean style and modern design. The glass façade, which extends over the entire front and has an electric sliding door, provides this mobile showroom with plenty of daylight and a welcoming atmosphere. The ExpoBoxx is fully equipped for use at events, coming with an independent power supply, air conditioning and heating unit, LED lighting, technical systems and equipment, all of which create the comfortable environment essential for a successful roadshow or exhibition. Plus, the low floor height of only 6 inches and flat entrance ramp ensure accessibility to the space is available to everyone.

What's more, the Expoboxx offers next-level logistical and onsite efficiency, leading to exceptional cost savings. A unique feature when it comes to temporary event structures, the ExpoBoxx utilises an ingenious hydraulic system that lets the space level itself. This saves not only an enormous amount of logistics and time spent on assembly, but is also very cost-efficient, since no additional crane is needed to place the ExpoBoxx on the ground. Within a few minutes, the integrated hydraulic system enlarges the exhibition

unit with two slide outs and lifts it from the truck onto floor level - creating a spacious interior of 30m<sup>2</sup>.
